DETAILED ACTION

Allowable Subject Matter

1. Claims 9-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art teaches bonding two shaft sections to a transition member with a barrier layer but does not teach the barrier layer between two different alloys at either end of the transition member. The transition member is typically made of a single alloy. Although inertial welding of such members is known, the shaft members do not typically comprise metal matrix composites. See Nguyen-Dinh (USPN 6291086) and Yamamoto et al. (USPN 6514631).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Myers et al. (USPN 5826331, components, friction fit not friction welding), Mak et al. (USPN 5277661, MMC, barrier layer, alloys, not inertial welding), Wojciechowski et al. (USPN 6210283, MMC, barrier layer, alloys, no barrier layer),

Wadleigh (USPN 5271287), DeLange et al. (USPN 6273474) and Sharp, Jr. (USPN 3798011).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynne Edmondson whose telephone number is (571) 272-1172. The examiner can normally be reached on Monday through Thursday from 6:30 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
